

Self-Perceived Affective, Behavioral, and Cognitive Reactions Associated with Voice and Communication in People with Parkinson's Disease

The Davies School of Communication Sciences and Disorders at the Fort Worth Campus of Texas Christian University is conducting research to investigate the emotional reactions, attitudes and coping behaviors regarding voice problems in Parkinson's disease.

WE ARE RECRUITING:

- ADULTS with a diagnosis of Parkinson's Disease
- Together with a communication partner (e.g. spouse, child, caregiver, ...)
- Without a history of neurological disorders or speech and voice disorders not related to Parkinson's disease

WHAT WILL YOU DO?

You and your communication partner will be asked to fill out a questionnaire online, which will take about 1-2 hours. There are no risks involved in this research.
